

GMOT - OCCUPATIONAL THERAPY (GMOT)

GMOT 6050 Interprof Training Specific LD (0 Credits)

The Project Write to Learn offers an implementation science educational sequence comprised of five units designed for program scholars to gain knowledge, understanding, and experience for the provision of integrated services for improving written expression in children with Specific Learning Disabilities.

GMOT 6055 Prjct Transition Children ASD (0 Credits)

GMOT 6100 Professional Formation I (2 Credits)

This course focuses on the acquisition of professional knowledge and skills expected of graduate students in a professional program.

GMOT 6155 Fcntrl Anatomy-Kinesiology I (4 Credits)

This course focuses on understanding and analyzing typical and atypical human movement across the life span using anatomy and kinesiology principles. This course includes labs.

GMOT 6160 Neuroscience for Occ Therapy (2 Credits)

This course covers body functions and structures of the nervous system, including the impact of impairment on activity and participation.

GMOT 6170 Occup Therapy Practice Skills (2 Credits)

This course introduces basic health assessment; client and provider safety; and demonstration and integration of occupational therapy practice skills. This course includes labs.

GMOT 6185 Intro to Occupational Therapy (4 Credits)

This course introduces the students to the foundations of the occupational therapy profession. This course includes labs.

GMOT 6200 Professional Formation II (2 Credits)

This course develops critical thinking and clinical reasoning skills for occupational therapy practice.

GMOT 6231 Selected Topics in OT (2 Credits)

GMOT 6240 Fcntrl Anatomy Kinesiology II (2 Credits)

This course continues to focus on understanding and analyzing typical and atypical human movements across the life span using anatomy and kinesiology principles. This course includes labs.

GMOT 6250 Group Process in Occup Therapy (4 Credits)

This course integrates theories of group dynamics and leadership with the development and implementation of functional activity-based groups. This course includes fieldwork I experiences.

GMOT 6260 Cognition Percep Vision -Funct (3 Credits)

This course addresses cognition, perception, and visual impairments; their impact on function; and principles of related occupational therapy assessments and interventions. This course includes labs.

GMOT 6270 Occupational Therapy Process (4 Credits)

This course introduces the principles and implementation of the occupational therapy process.

GMOT 6301 Hlth Med Complex Older Adult (2 Credits)

This course examines common health conditions associated with older adults and how impairment impacts activity and participation.

GMOT 6303 Evaluation of Older Adults (2 Credits)

This course focuses on the evaluation and assessment of older adults.

GMOT 6305 Intervention for Older Adults (4 Credits)

This course integrates theories and interventions for occupational therapy practice with older adults. This course includes labs and fieldwork I experiences.

GMOT 6520 Adult Rehab In OT I (3 Credits)

GMOT 6700 Professional Formation III (2 Credits)

This course continues to develop clinical reasoning, clinical integration and evidence-based practice. This course includes service learning experiences.

GMOT 6750 Health Med Complexities Adults (2 Credits)

This course examines common health conditions associated with adults and how impairment impacts activity and participation.

GMOT 6760 Evaluation of Adults (2 Credits)

This course focuses on the evaluation and assessment of adults.

GMOT 6770 Intervention for Adults (6 Credits)

This course integrates theories and interventions for occupational therapy practice with adults. This course includes labs and fieldwork I experiences.

GMOT 6780 Prof Ethics in Occup Therapy (2 Credits)

This course introduces principles of ethics and law for occupational therapy practice.

GMOT 6800 Professional Formation IV (2 Credits)

This course advances clinical reasoning and knowledge of#culturally responsive service delivery when collaborating with diverse clients.

GMOT 6850 Hlth Med Complex Children Adol (2 Credits)

This course examines common health conditions associated with children and adolescents and how impairment impacts activity and participation.

GMOT 6860 Evaluation Children Adolescent (2 Credits)

This course focuses on the evaluation and assessment of children and adolescents.

GMOT 6870 Intervention for Children Adol (5 Credits)

This course integrates theories and interventions for occupational therapy practice with children and adolescents. This course includes labs and fieldwork I experiences.

GMOT 6880 Wellness - Entrepreneurship I (3 Credits)

This#first of a two-course#sequence#examines emerging occupational therapy practices, program development, and research in practice. This course includes#preparation for the#service learning and/or capstone project.

GMOT 6960 Health Care Policies Organiz (3 Credits)

GMOT 6965 Health Care Policies - Organ (2 Credits)

This course addresses the practice and management of occupational therapy services across healthcare, education and community environments.

GMOT 6970 Fieldwork Preparation (1 Credit)

This course addresses expectations, trends and issues in the clinical environment to facilitate successful performance in level II fieldwork.

GMOT 6980 Wellness - Entrepreneurship II (4 Credits)

This course continues with the application#and community delivery#of service learning/capstone projects developed in Wellness and Health Promotion I.

GMOT 7000 Professional Formation V (1 Credit)

This course focuses on transitioning into professional roles and continued professional development as practitioners and managers.

GMOT 7013 Fieldwork Level II-Phase I (3 Credits)

The Level II Fieldwork course requires students to integrate the roles of practitioner, contributor, and manager in a clinical setting. Time spent in clinical setting is equivalent to a full-time job.

GMOT 7022 Fldwrk Lvl II - Phase II - opt (2 Credits)

GMOT 7023 Fieldwork Level II, Phase II (3 Credits)

The Level II Fieldwork course requires students to integrate the roles of practitioner, contributor, and manager in a clinical setting. Time spent in clinical setting is equivalent to a full-time job.

GMOT 7033 Fieldwork Level II, Phase III (3 Credits)

This optional Level II Fieldwork course requires students to integrate the roles of practitioner, contributor, and manager in an additional area. Time spent in clinical setting is equivalent to a full-time job.

GMOT 7303 Research Methods I (3 Credits)

This course addresses the use of quantitative methods to inform clinical practice and research.

GMOT 7310 Research Methods I (2 Credits)

GMOT 7320 Research Methods II (2 Credits)

This course continues to address research for and in practice.

Prerequisites: (GMOT 7303 or OTFY 4303)

GMOT 7510 Sem in Adv Theory-Pract (3 Credits)
