

# CORE CURRICULUM

The hallmark of a liberal education is that it entices a student to examine the tree of knowledge, to see both the distinction and interdependence of its branches. Through its program, the College of Arts and Sciences offers students the opportunity to examine areas of the humanities and sciences in depth, while exposing them to the breadth of the related disciplines.

The following core curriculum is the basis of the education of all students in the College of Arts and Sciences. This statement of the core curriculum begins with a discussion of the aims of a college education and proceeds to a listing of the various elements of the core requirements.

The College of Arts and Sciences recognizes the value of the distinctive and complementary perspectives of humanities, physical and biological sciences, and the social and behavioral sciences in understanding our world and the human condition. Its core curriculum is designed to enable students to be conversant with the goals, methods, and values of these perspectives and to acquire the habits of mind to appreciate and contribute to the constantly evolving body of knowledge.

In order to understand and place in personal perspectives the world in which they live:

1. Students will grasp the relationship between themselves as individuals and their communities, and develop an appreciation for the past's influence on the present and the cultural differences and challenges posed by increased globalism.
2. Students will display the ability to write clearly and effectively, to read texts critically, to articulate ideas, to reason quantitatively and to use appropriate technology.
3. Students will develop the analytical tools required for an appreciation of the strengths and limitations of scientific methodologies and their applications to the natural world as well as human behavior.
4. Students will acquire basic interpretive tools to develop an appreciation of human creativity in its many forms, and understand its central place in people's daily lives and rituals.
5. Students will appreciate and understand diverse human existence including its spiritual dimension and critically assess their values.

In addition to these broad liberal education objectives, students will develop competence in an academic discipline or area of study.

## The Arts and Sciences Core Curriculum

The following are the requirements for the Core Curriculum of the College of Arts and Sciences and courses and examinations that fulfill these requirements for students required to complete 120 credits to obtain a Bachelor's degree from Seton Hall University. The A&S Core Curriculum focuses on the following eight areas:

- **Aesthetics.** Courses in this category will provide students with the knowledge and skills to engage in analyses of artistic work by identifying rules and principles of form in various genres and exploring the development of creative expression across diverse periods and cultures.
- **Diversity.** Courses in this category will examine in diverse cultural contexts how societies are structured and social inequality is engendered through relations of power.
- **Humanities.** Courses in this category employ textual analysis, critical thinking, and narrative to formulate arguments about a range of

experiences past and present. Through the study of history and literature, students will enrich their comprehension of the complexity, nuance, and fullness of human endeavor.

- **Language.** Students will attain an intermediate level of mastery in a classical or modern language. In so doing they will experience a sustained engagement with a culture other than their own and enhance their understanding of the structure of language and its significance as a vehicle for cultural expression.
- **Rhetoric.** To be prepared to speak in public, and to understand the varieties of speech discourse, students will study and practice presentations and other forms of spoken influence.
- **Philosophy and Religion.** Through discipline-specific study of philosophy and religion, students will critically examine fundamental questions of knowledge, reality, faith, and ethics.
- **Science and Mathematics.** Science courses in this category will provide students with an understanding of processes of scientific inquiry as applied to natural and physical phenomena in the world around them. Mathematical courses in this category will provide students with reasoning skills as they apply to quantitative problem solving. Students will gain an understanding of the application of mathematical and computational methodologies and modeling to problems in society and the natural world.
- **Social Science.** Courses in this category will acquaint students with theoretical approaches that explain human behavior and social and institutional structures through various methodologies including critical, qualitative, and quantitative.

A course taken to fulfill one core requirement may not be used to fulfill another core requirement.

## Bachelor of Arts (B.A.) Core Curriculum

The following are the requirements for the Core Curriculum of the College of Arts and Sciences and courses and examinations that fulfill these requirements for students required to complete a minimum of 120 credits to obtain a Bachelor of Arts degree from Seton Hall University.

Code	Title	Hours
<b>CORE</b>		
CORE 1001	University Life	1
CORE 1101	Journey of Transformation	3
CORE 2101	Christianity and Cult in Dial.	3
CORE 3XXX	Engaging the World	3
ENGL 1201	Core English I	3
ENGL 1202	Core English II	3
<b>Total Hours</b>		<b>16</b>

## College of Arts and Sciences Core for B.A. Students

Code	Title	Hours
<b>Aesthetics</b>		
Complete one course from the following:		3
ARTH 1001	Art and Human Needs	
ARTH 1101	Art of the Western World	
ARTH 2107	American Art	
COBF 2232	Evolution of the Film Art	
COTH 2621		
MUHI 1102	Music and Civilizations	

MUHI 1108	American Music as an Agent of Change	
Subtotal		3

Code	Title	Hours
<b>Humanities</b>		
Complete three courses (nine credits), including one two-semester sequence. <sup>1</sup>		9
AFAM 1111	Introduction to African-American Studies	
AFAM 1201 & AFAM 1202	History of Africa I and History of African Civilization II	
or HIST 1501 & HIST 1502	History of Africa I and History of African Civilization II	
ASIA 1601 & ASIA 1602	History of Traditional Asia and History of Modern Asia	
or HIST 1601 & HIST 1602	History of Traditional Asia and History of Modern Asia	
ASIA 2101 & ASIA 2102	Asian Literature in English Translation I and Asian Literature in English Translation II	
or ENGL 360 & ENGL 360S	Asian Literature in English Translation I and Asian Literature in English Translation II	
CAST 1001	The Search for Human Fulfillment
