

SUPPLY CHAIN MANAGEMENT CERTIFICATE

(For both Business and Non-Business Majors)

Supply Chain Management (SCM) is a process used by companies to ensure that the chain of activities starting with acquisition of raw materials and ending with the delivery of goods to the customer and after-sales service are all well integrated and carried out effectively and efficiently. Supply Chain Management integrates supply and demand management functions within and across companies. With increasing globalization of business over the past few decades, supply chains have increased in prominence within most companies. There is now a growing need for people who understand and can effectively manage large supply chains.

The Certificate in Supply Chain Management is a four-course (12-credit) sequence that consists of:

Code	Title	Hours
BQUA 2812	Quantitative Decision Making	3
BITM 3732	Enterprise Resource Planning Systems	3
BITM 3741	Supply Chain Management	3
Select one of the following:		3
BITM 3753	Enterprise-Wide Accounting Information Systems II	
BMGT 4562	Negotiation	
BMKT 4625	Retail Marketing	
BQUA 3840	Procurement Management	
Total Hours		12

All four courses taken must be completed with a grade of C or better.
